HUSA Program (Hiroshima University Study Abroad Program) OB Students' Cooperation for the General Science (GS) Research Project of SSH (Super Science High School) Scheme of Hiroshima University High School

HUSA Program OB students have been cooperating with the "General Science" Research Project of the "Super Science High School Project" scheme of the High School affiliated with Hiroshima University. In General Science course forty research projects have been going on currently. High school students decide the research theme of their group research projects from wide range of topics in science, social science, and humanities. The group, working on "Effective Advertisement for Japanese Corporations Who Want to Expand Their Business to the USA," interviewed Mr. Michael Merritt who is the HUSA Program OB student and currently residing in the USA in December, 2021. High school students, having gained new insights and international perspectives, will develop their research further. They are expected to conduct a presentation on their research findings in the Joint Research Presentation Seminar (Japan, Thailand, and Korea) to be held on February 18, 2022.
