アトラクション Performances

1. チアサークル・フェニックス - Cheer Circle Phoenix

Our 'Cheer Circle Phoenix' was established this year and has been growing. Have you ever seen cheer leading in Japan? Many questions were asked by cheer leaders around the world – How can they play such a wonderful stunts with such slender and small bodies? We have not reached such a high level, but we try hard every day. Please shout with us our term color 'Red and Gold'.

私たちチアサークルフェニックスは,今年発足したばかりのまだまだ成長中のチアリーディングチームです.みなさんは,日本のチアリーディングを見たことがありますか?実は,世界中のチアリーダー達から沢山疑問が寄せられているのだそうです.「どうやったら、あんなに細く小さい体で素晴らしいスタンツができるのか・・?」と.私たちはまだまだそんなレベルには達していませんが,日々がんばっています.どうぞ,楽しんで見てください!チームカラーの'Red and Gold'のコールもよろしければご一緒に叫んでいただけたらとおもいます。

2.太極拳 - Taichi

A common image of China is one of everlasting history, the Great Wall, oily but tasty cooking, and Taichi. Indeed, all these images represent China, but many of them are full of stereotypes and misunderstandings. Today, we are going to explain one of them, Taichi. In the four thousand years of Chinese history, Taichi was created relatively recently, about 300 years ago in the beginning of Ch'in Dynasty. Taichi was developed by taking an inspiration from various perspectives of fighting techniques, medical sciences, and materialistic philosophy. Typical movements of push and breath can provide training not only for muscles and bones but also the internal organs, resulting in a more active metabolism. Advanced Taichi masters can reach the level of not to losing their breath, even though they are sweating. Due to this health reason, Taichi has become very popular recently, not only among older people but also younger people.

中国に対するイメージと言えば,悠久の歴史,万里の長城,油っこいけどおいしい料理,太極拳・・・どれも中国を代表する物ですがその多くがステレオタイプと誤解に満ちています.今日はその中の一つ,太極拳について説明をします.4 千年とも言われる歴史の中で太極拳が生まれたのは以外に最近で,およそ 300 年前の清の王朝の初めでした.中国の民間と軍隊とに存在する様々な拳法,医学,唯物哲学などにインスピレーションを受け完成した集大成が太極拳であると言っても過言ではありません.代表的な動きとして押してそして呼吸を整えるという動作は,筋肉や骨を運動させるだけではなく内臓をも鍛えることができます.その結果,新陳代謝が活性化され,上級者にもなれば運動中に汗をかくことがあっても息切れはしないと言う境地に達する者さえいます.そのため太極拳は健康に良いとされ,今ではお年寄りだけではなく若い世代の人達にも人気があります.
